## The KING FORTUNE-MAKER OZONE

A new Process for Preserving all Perishable Articles, Animal and Vegetable, from Fermentation and Putrefaction, Retaining their Odor and Flavor.

"OZONE—Purified air, active state of oxygen."—Webster.

This Preservative is not a liquid, pickle, or any of the old exploded processes, but is simply and purely OZONE, as produced and applied by an entirely new process. Ozone is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay.

There is nothing on the face of the earth liable to decay or spoil which Ozone, the new Preservative, will not preserve for all time in a perfectly fresh and palatable condition.

The value of Ozone as a natural preserver has been known to our able chemists for years, but, until now, no means of producing it in a practical, inexpensive and simple manner have been discovered.

Microscopic observations prove that decay is due to septic matter or minute germs, that develop and feed upon animal and vegetable structures. Ozone, applied by the Prentiss method, seizes and destroys these germs at once, and thus preserves. At our offices in Cincinnati can be seen almost every article that can be thought of, preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of Ozone as a preservative. We will also preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender, for him to keep and test.

**FRESH MEATS**, such as beef, mutton, veal, pork, poultry, game, fish, &c., preserved by this method, can be shipped to Europe, subjected to atmospheric changes and resists to this country in a state of perfect preservation.

**EGGS** can be treated at a cost of less than one dollar a thousand dozen, and be kept in an ordinary room six months or more, thoroughly preserved; the yolk held in its normal condition, and the eggs as fresh and perfect as on the day they were treated, and will sell as strictly "choice." The advantage in preserving eggs is readily seen; there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them, can be sold for an advance of from one hundred to three hundred per cent. One man, with this method, can preserve 5000 dozen a day.

**FRUITS** may be permitted to ripen in their native climate, and can be transported to any part of the world.

The juice expressed from fruits can be held for an indefinite period without fermentation—hence the great value of this process for producing a temperance beverage. Cider can be held perfectly sweet for any length of time.

**VEGETABLES** can be kept for an indefinite period in their natural condition, retaining their color and flavor, treated in their original packages, at a small expense. All grains, flour, meal, etc., are held in their normal condition.

**BUTTER**, after being treated by this process, will not become rancid.

Dead human bodies, treated before decomposition sets in, can be held in a natural condition for weeks, without puncturing the skin or mutilating the body in any way. Hence the great value of Ozone to undertakers.

There is no change in the slightest particular in the appearance of any article thus preserved, and no trace of any foreign or unnatural odor or taste.

The process is so simple that a child can operate it as well as and as successfully as a man. There is no expensive apparatus or machinery required.

A room filled with different articles, such as eggs, meat, fish, etc., can be treated at one time, without additional trouble or expense.

"In fact, there is nothing that Ozone will not preserve." Think of everything you can that is liable to decay, or spoil, or rot, and remember that we guarantee that Ozone will preserve it in exactly the condition you want it for any length of time. If you will remember this, it will save asking questions as to whether Ozone will preserve this or that article—it will preserve anything and everything you can think of.

There is not a township in the United States in which a live man cannot make any amount of money, from \$1,000 to \$10,000 a year, that he pleases. We desire to get a live man interested in each county of the United States, in whose hands we can place this Preservative, and through him secure the business which every county ought to produce.

### A FORTUNE Awaits Any Man who Secures Control of OZONE in any Township or County.

A. C. Bowen, Marion, Ohio, has cleared \$2,000 in two months. \$2 for a test package was his first investment.

Woods Brothers, Lebanon, Warren County, Ohio, made \$6,000 on eggs purchased in August and sold November 1st. \$2 for a test package was their first investment.

F. K. Raymond, Morristown, Belmont Co., Ohio, is clearing \$2,000 a month in handling and selling Ozone. \$2 for a test package was his first investment.

D. F. Webster, Charlotte, Eaton Co., Mich., has cleared \$1,000 a month since August. \$2 for a test package was his first investment.

J. B. Geylford, 80 La Salle St., Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging \$24 per dozen. He is also selling articles in his paper. He is preserving 5,000 dozen eggs per day, and on his business is making \$3,000 a month clear. \$2 for a test package was his first investment.

The Cincinnati Feed Co., 498 West Seventh Street, is making \$3,000 a month in handling and selling Ozone, charging \$24 per dozen. He is also selling articles in his paper. He is preserving 5,000 dozen eggs per day, and on his business is making \$3,000 a month clear. \$2 for a test package was his first investment.

These are instances which we have asked the privilege of publishing. There are scores of others. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of every thing we have said in this paper, "we propose to place in your hands the means of proving for yourself that we have not claimed half enough." To any person who doubts any of these statements, and who is interested sufficiently to make the trip, we will pay all traveling and hotel expenses for a visit to this city, if we fail to prove any statement that we have made.

### How to Secure a Fortune with Ozone

A test package of Ozone, containing a sufficient quantity to preserve one thousand dozen eggs, or other articles in proportion, will be sent to any applicant on receipt of \$2. This package will enable the applicant to pursue any line of tests and experiment he desires, and thus satisfy himself as to the extraordinary merits of Ozone as a preservative. After having thus satisfied himself, and had time to look the field over to determine what he wishes to do in the future—whether to sell the article to others, or to continue it to his own use, or any other line of policy which he may desire to pursue—he will enter into an agreement with him that will make a fortune for him and give us good profits. We will give exclusive township or county privileges to the first responsible applicant who orders a test package and desires to control the business in his locality. "The man who secures control of Ozone for any special territory, will enjoy a monopoly which will surely enrich him."

Don't let a day pass until you have ordered a Test Package, and if you desire to secure an exclusive privilege we assure you that delay may deprive you of it, for the applications come in to us by scores every mail—many by telegraph. "First come first served" is our rule.

If you do not care to send money in advance for the test package we will send it C. O. D., but this will put you to the expense of charges for return of money. Our correspondence is very large; we have all we can do to attend to the shipping of orders and giving attention to our working agents. Therefore, we can not give any attention to letters which do not order Ozone. If you think of any article that you are doubtful about Ozone preserving, remember we "guarantee that it will preserve it, no matter what it is."

### REFERENCES:

We desire to call your attention to a class of references which no enterprise or firm based on any thing but the soundest business sense and highest commercial merit would secure. We refer by permission to our integrity and to the value of the Prentiss Preservative, to the following gentlemen: Edward C. Boyce, Member Board of Public Works, E. O. Eschelby, City Comptroller; Amor Smith, Jr., Collector Internal Revenue; Wain & Worthington, Attorneys; Martin H. Harrell and B. F. Hopkins, County Commissioners; W. S. Cappeller, County Auditor; all of Cincinnati, Hamilton County, Ohio. These gentlemen are each familiar with the merits of our Preservative, and know from actual observation that we have without question.

### The Most Valuable Article in the World.

The \$2 you invest in a test package will surely lead you to secure a township or county, and your way is absolutely clear to make from \$2,000 to \$10,000 a year. Give your full address in every letter, and send your letter to

### Over Capitalization.

New York, 16.—There is a movement on foot in mining stock circles down town for a reform in the present system of capitalizing mines. Many of the properties dealt in at the two exchanges devoted to dealings on mining securities, are admitted to be capitalized at absurdly high figures, and it is believed that the present dullness of trade, and the distrust with which all mining enterprises are regarded by the general public, are due in great measure to that fact. People who notice certificates of a par value of say \$25 selling freely at the market price of a few cents, fancy there is something irregular and dishonest about the whole scheme and stand aloof from it. A bill will probably be introduced when the legislature meets providing for a uniform system of capitalizing all mining properties dealt in here. Secretary Wood, of the Mining Exchange said: "I can't myself tell you the par of any of the stocks on our list except California ones, which, generally speaking, have a uniform par of \$100. However, it would not be well to have the number of shares in any case too small. Take Mount Diablo and Northern Belle—they have each only 50,000 shares; the Virginia and California have only 540,000 shares each. When shares are so few, traders are afraid to sell stock short as they could easily be cornered. This is a disadvantage. It is well to have stock sold 'short' occasionally, as it helps to make the market. So far as lies in its power the exchange has already instituted some reform in this matter, and when a mine is sought to be listed at extravagant capitalization, as for instance with 1,000,000 shares, the committee declines to entertain the application."

### Cabinet Talk.

New York, 16.—The Graphic's Washington correspondent says: The name of ex-Senator Howe is again canvassed for a place in the cabinet, and his friends say the President has announced his intention to give him a place although he does not say which. His supporters claim that he will be made postmaster general. Chauncey Filley's friends are nothing daunted, however, despite the possibility of Howe's return. It is thought that California will not get a place at all unless she accepts General Edwin Beale. It is understood she was offered Beale, but repudiated him and pressed Sargeant, Beale, it is claimed, will be appointed secretary of the navy without much doubt and there was a disposition to allot him to California, because his business interests are chiefly there, and he spends about half of his time on his ranch, where he owns thousands of cattle. California statesmen, however, claimed, it is said, that he lived in the District of Columbia and they declined to accept him. He will, therefore, probably be credited to the district, and take the navy portfolio when Judge Hunt is put back in the court of claims. Colorado is still divided between Chaffee and Routt, Senator Teller being for the former and Senator Hill pressing the latter on the ground that he is backed by a majority of the people of the state for the position, if the state is recognized at all; though it is most likely that no more cabinet names will be sent in until after the holidays, as so much business is pressing in the way of settling postoffice contests, that the President has little time to give other matters consideration.

### Gunnison Improvement.

Philadelphia, Pa., 15.—The Gunnison Improvement Company, of Colorado, heretofore controlled by a party in Philadelphia, has been purchased by a New York syndicate known as the Gunnison Coal Company of New York. The terms of purchase are that the syndicate gets control of all the property of the Gunnison Improvement Company by handing over 240,000 shares of the Gunnison Coal Company, of New York, and then agreeing to buy 40,000 shares of that same stock back at a dollar per share, payments to be made as follows: \$10,000 in cash \$10,000 in thirty days, \$10,000 in sixty days thereafter and \$10,000 in ninety days more. The syndicate have the option within thirty days after the last payment of buying back the 200,000 shares remaining by instalments as follows: \$10,000 at \$1.50 per share within one month, the same amount at \$2.00 within two months, \$2.50 within three months and \$3.00 within four months.

### Precocious Colts.

New York, 16.—Owen A. Hicock, with a quartette of precocious trotters, has arrived here and taken up his quarters at Briggs' stable. The string is composed of the 3-year-old brown filly "Sweet Heart," the 2-year-old bay filly "Eva," who is a full sister to the first named trotter, the 4-year-old black gelding "Lagrange," and a bay gelding, yearling, as yet unnamed. All are in excellent health, except "Lagrange," who is suffering from cold, but is rapidly recovering. It is the intention of Hicock to winter the chargers either in Philadelphia or Washington, probably the former. He is at present located at the Hoffman House.

### The Garfield Sick Expenses.

New York, 15.—The Herald's Washington, says the money to pay the expenses of Garfield's illness will be disbursed as follows: Drs. Bliss, Agnew and Hamilton are to receive two thirds, would give to each about \$24,000 or \$27,000. The physicians say that under no circumstances will they present bills either to Mrs. Garfield or against the estate of her deceased husband. The four nurses are to receive \$2,000 each. Dr. Lamb, of the surgeon general's office, is to receive \$5,000 for the autopsy which he made. Reyburn, who was Bliss' assistant, will also receive a reasonable sum for his constant attendance. It is not known what charge the railroad companies will make for the use of special trains, or for the construction of new tracks, laid in Washington and at Long Branch.

### House Committees.

New York, 15.—Tribune's Washington: The composition of the House committees continues to be the subject of chief interest at Washington, and its discussion gives evidence of sectional feeling. The two leading candidates for the chairmanship of the committee on commerce are generally thought to be Page, of California, and Townsend, of Ohio, and the drift of opinion seems to be that Page is most likely to win the prize for which there are so many competitors.
